

## One Source. Complete Solutions.

Ingram Micro's Data Capture/POS Division enables profitable point-of-sale (POS) and auto-ID businesses for our channel partners. With the largest dedicated field-sales organization in the market, our partners have easy access to unmatched product breadth, precise logistics support and value-add services. Resellers, whether established data capture/POS VARs or those expanding into this market, can leverage the division's support to accelerate growth and extend relationships with their clients.

Our customers gain ready access to Ingram Micro's expansive line card, featuring best-of-breed, complementary IT products. From computers, to wireless networks, to security, Ingram Micro's customers find a truly complete solution to enhance their AIDC, POS and mobile applications, establishing them as trusted advisors to their clients and opening new business opportunities.

### We offer:

- Complete, end-to-end solutions • Innovative marketing programs
- World-class logistics • Flexible financing options
- Innovative credit programs • Expert inside and outside sales staff
- Dedicated technical help desks
- Advanced e-commerce capabilities

# IMPROVED POINT-OF-CARE DATA COLLECTION FOR HEALTHCARE

## HEALTHCARE SPECIMEN COLLECTION SOLUTION

Today's healthcare environment is more complex than ever before. As a result, medical errors have been defined as one of the largest safety gaps in the industry.

To help overcome these challenges, Ingram Micro offers a complete point-of-care specimen collection system that uses bar-code and mobile printing technology to monitor bedside administration of all medications.

**With our solution you can:**

- Simplify HIPAA compliance.
- Improve patient billing accuracy with improved tracking of consumables.
- In the lab, track and manage samples during testing and diagnostic phases by bar coding vials, Petri dishes, slides and more.
- Reduce specimen identification and tracking errors.

**Components include:**

- Honeywell's Dolphin 9900hc is the first mobile computing solution available with disinfectant-ready housing. With maximum reliability and bedside ease-of-use, the Dolphin features point-and-shoot bar-code reading and extended battery power for full-workday usage without recharging.
- Zebra's QL 220 Plus is a compact, lightweight thermal mobile printer that helps dramatically reduce labeling errors by allowing clinicians to immediately label blood or specimen draws at the bedside. With advanced, secure wireless connectivity and long battery life, the QL 220 is easy for nurses and phlebotomists to carry to the point of care via a belt clip, shoulder strap or cart.

From the patient's bedside to the laboratory, our specimen-collection solution can help reduce medical errors and streamline the data capture and storage processes.
