- Want to sell cellular wireless without dealing directly with the carriers?
- Confused with carrier activation tools and looking for someone else to manage your customer activations?
- Tired of waiting 60+ days to get paid for an activation?
- Do you need access to more devices, application and accessories than just what the carriers are selling?

Ingram understands that while selling mobility solutions may not be your primary focus, you are still presented with opportunities to help your customers take advantage of the benefits of being “mobile”. If mobility is your focus then Ingram can help by doing all the “heavy lifting,” allowing you to concentrate on selling.

Ingram can help with the following and more:

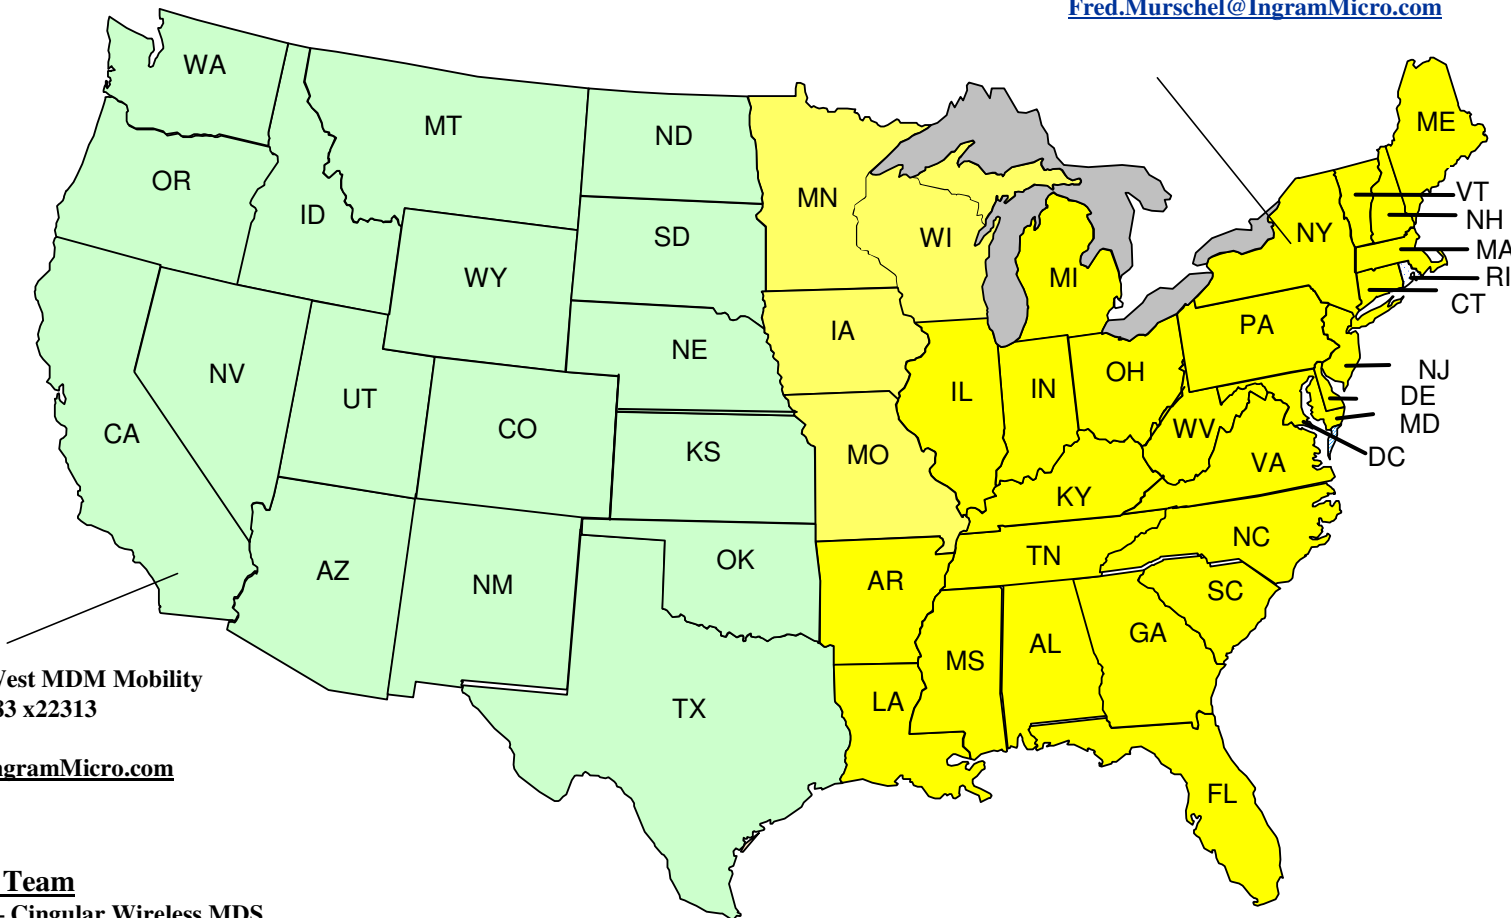

- Managing the **activation process** with the carriers via a unified simplified tool
- Paying out **commissions within 15 days** from the end of the month if we manage your activation ... we do not wait for the carriers to pay us before we pay you!
- Managing any **flashing, configuration, kitting/bundling** requirements
- Support any **middleware licensing** requirements – Microsoft, Good, RIM, Intellisync, etc...
- **Robust Internet site** to help you understand the mobility market – www.ingrammicro.com/mobility
- Resources to help **train your sales teams** or just to be there to help understand the carrier programs and answer questions
