- Broad offering of touch technologies for virtually any application
- Consistently reliable, accurate, durable products
- Stable, drift-free operation
- Scratch-free construction
- Long warranties
- Unmatched durability and performance
- Wide variety of configurations and form factors for design flexibility
- Unbeatable service and support
- Custom solutions for special requirements
- Agency approvals on touchscreen, controller components and touchmonitors

What is Touch?

- Enables people to become instant experts
- Virtually eliminates operator errors because users select from clearly defined menus
- Eliminates keyboards and mice, which many find intimidating and cumbersome to use
- Is rugged enough to withstand harsh environments that often damage keyboards and mice
- Provides fast access to any and all types of digital media with no text-bound interface getting in the way
- Ensures that no space is wasted: the input device is completely integrated into the monitor

Which technology is best for my application?

Elo offers specific guidance in selecting the best technology for your application because this is one of the most commonly asked questions. Here are more resources to help you make the best possible choices to suit your needs:

- Product compliance initiatives
- Product updates
- Operating system support
- Warranty information
- Discontinued products with suggested replacements
- Regulatory agencies
- Our customer care form, which lets you comment on our products, policies, personnel or web site
- Glossary
